Barebones VPS Product Guide

CRUCIAL

Why is **Crucial** the right choice?

Green Host
We offset our carbon emissions through The Nature Conservancy.

99.9% Uptime Guaranteed
Keeping your business online and in front of customers is our main priority.

Australian Owned and Operated
Our servers are located right here in Sydney at the Equinix SY3 datacentre.

24x7x365 Support
You'll be supported by our 24-hour tech team and Sydney-based phone support.

No Lock-In Contracts
Yep, we understand small businesses need to be flexible.

No Set-up fees
Your Australian VPS Hosting is free to set up and is activated instantly!

CRUCIAL

Take control of your VPS.

Crucial's Barebones VPS is great for web developers and code gurus who like to build up from the bare essentials.

Your Control Panel VPS is built with features to ensure optimal performance such as:

✓ Fast SSD Storage

✓ Network Support

✓ Choice of Linux OS

✓ DDOS Protection

✓ Optional backups

✓ No management panel

CRUCIAL

Barebones VPS with Crucial.

Get in control of your virtual server today.

The Barebones VPS is perfect for that **command line ninja who loves to be more hands on** and do things themselves. We offer a choice of Linux operating systems without a control panel removing any overheads.

Other benefits include extremely fast storage thanks to the use of SSD disks, a handy iPhone app so you can start, stop and reboot the server on the run, an easy to use interface for controlling the server and backups which are offered as an 'on or off' solution so that you never have to lose sleep again wondering if you have enough space when your backup ran the other night

Additional Options to Boost your VPS - R1Soft

R1Soft Backup works by taking a full server backup, then incremental or 'changed-file' backups each night, thus creating 7 daily recovery points.

The advantage of R1Soft Backup over the typical FTP or image backup is the ability to login to the R1Soft Backup control panel via a web interface, browse and restore individual files or folders.

Crucial's R1Soft solution backups are an on/off option which covers the server from top to bottom so there's no need to worry about quotas or caps.
