# Take control of your VPS.

The Control Panel VPS is for those who want the ease of using cPanel, and the control of managing their service themselves. The Control Panel VPS is great for those who want to control their environment, and use the features of WHM for ease of use.

Your Control Panel VPS is built with features to ensure optimal performance such as:

- ✓ Fast SSD Storage
- ✓ 24x7x365 Support
- ✓ Dedicated CPU and RAM
- ✓ Root Access
- ✓ DDOS Protection
- ✓ WHM and cPanel
- ✓ Optional Backups
- ✓ Optional CloudLinux

# Control Panel VPS with Crucial.

Get in control of your virtual server today.

The Control Panel VPS is the perfect balance for people who enjoy the comfort of a control panel while enjoying the freedom of being able to manage the server on their own. It comes prebuilt with the industry leading control panel, WHM, which allows you to easily setup accounts, email addresses and much more.

Root access to the server enables you to have more control over the server whilst having WHM installed allows you to quickly create packages for your new sites or customers that you wish to on-board.

Backed by our 24x7 support its the perfect mix of performance, customization level and assistance when you need it.

Additional Options to Boost your VPS - CloudLinux

CloudLinux helps to balance your server resources across cPanel accounts. This helps to prevent against 'noisy neighbours' and ensures consistent performance for all of your customers.

By limiting the resource each cPanel account used, CloudLinux will prevent the server from using all the available memory, improving its stability and protecting your sites from going offline.

**\$15.00 /month - No set up fee**

# Control Panel VPS with Crucial.

## Additional Options to Boost your VPS - R1Soft

R1Soft Backup works by taking a full server backup, then incremental or 'changed-file' backups each night, thus creating 7 daily recovery points.

The advantage of R1Soft Backup over the typical FTP or image backup is the ability to login to the R1Soft Backup control panel via a web interface, browse and restore individual files or folders.

Crucial's R1Soft solution backups are an on/off option which covers the server from top to bottom so there's no need to worry about quotas or caps.
